

Operations Analyst Job Specification

Would you like the opportunity to work within a growing, dynamic team within a niche wealth management firm? We are seeking to hire an Operations Analyst.

Reporting to the Operations Manager, the ideal candidate will possess a minimum of 2 years' experience in a similar role within the financial services industry.

The ideal candidate would be positive, organised and have a proven ability to interact with staff (at all levels) in a fast-paced environment, sometimes under pressure, remaining flexible, proactive, resourceful and efficient with a high level of professionalism and confidentiality is crucial to this role. Expert written and verbal communication skills, strong analytical and numeracy abilities with attention to detail are equally important.

About MASECO Private Wealth

MASECO Private Wealth was founded in 2008 in the wake of the non-domicile tax rules being introduced in the UK. The Partners had previously developed the US/UK private client desk within a large Private Bank in London. They realised that as a result of these legislative changes, a different approach would be required to service the needs of US citizens living in the UK. The alternative structure needed to remain not only tax-efficient and cost effective for American individuals living in the UK but would also need to be built upon global best practices. Just 14 years later, MASECO oversees over \$2.6 billion in assets for approximately 800 families.

What we do

MASECO develops and implements global, tax-efficient wealth strategies for families, trusts and foundations based in the UK, USA and internationally. Our aim is to deliver expert advice, designed to simplify and tackle the complexities associated with cross-border wealth management. We deliver comprehensive wealth management and investment advice to clients based on trust and open communication. Our mission is to guide families with cross-border economic interests to a meaningful financial future. MASECO's Wealth Management equation provides a framework for the delivery of a systematic wealth management offering:

Wealth Management = Investment Management + Wealth Planning + Relationship Management

Our Values

MASECO has a core set of values that form the foundation of everything we do. This translates into behaviour that is consistently applied and communicated both internally among our employees and

externally among our clients. We strive to provide a Phenomenal Client Experience and seek to work with individuals and intermediaries who understand and appreciate our DNA. We believe that as an organisation we have multiple responsibilities – to our clients, our employees, our suppliers and to the world around us. MASECO strives to ensure that decisions are made with these responsibilities in mind.

MASECO is proud to be the UK's first financial services B Corporation member. B Corp is an alternative vision of the role of business in society. It is an assertion that businesses can benefit shareholders whilst also solving social and environmental problems. We want to influence the way investing and charitable giving are viewed in both the financial and wider communities, and to promote the standards of accountability that being a B Corp member represents. www.bcorporation.net

Specific duties and responsibilities include:

- Data analysis and maintenance of the firm's investment management systems (Third Financial Software – IMS and CRM), including but not limited to responsibility for the following data – custodian data, client data, securities data, transactions, pricing feeds, currency data, benchmark and indices data, static data
- Onboarding of new custodians and providers, including, where required, new data feed implementation (transaction mapping, technical coding requirements & detailed testing)
- Continual review of the Operations processes and procedures to find efficiency and enhancements, automation where possible to reduce risk of human error, working with third party providers and internal departments, for example, MASECO IT, Compliance and Wealth Management Teams
- Market research and requirements gathering for potential solutions to improve process/system efficiencies within Operations and presenting recommendations to the Operations Manager to enact change
- Written requirements for new and existing IT applications liaising with IT to improve efficiencies and minimise system bugs
- Written documentation of new processes in required business format with periodic review and update
- Management of system upgrades of IMS and internal IT applications, including full system testing of new and existing functionality in UAT prior launch to the business
- Project work, both independently and as part of the team, to enhance processes and efficiencies in all areas of Operations and the wider business
- Generation and provision of key periodic MI reporting
